

What Is TruePath Technologies?

No Other Company In the Marketplace Like This!

- Increase your teams' education/knowledge as your monitoring grows
- No more big-bang monitoring - "Drinking from the fire hydrant"
- Inject a "Single Visualization" throughout your entire business!
- Provide consistency across all lines of business

TruePath Technologies provides a comprehensive, customizable suite of enterprise monitoring tools to enable your IT community to more proactively drive the optimization and reliability of your business infrastructure.

Leading edge service provider that leverages your IT team's knowledge giving your team the ability to react and fix issues within the infrastructure.

- Provide long term support to your IT team.
- Harness and increase the existing power/knowledge of your team!

Industry leading solution that takes out the hassle, headache, know-how and huge upfront costs of setting up enterprise monitoring and provides it to your staff through a growing suite of tools and training.

- Arm the different teams (Oracle, Unix, NT, etc.) with tools that THEY need
- Envelop working processes/programs that work today

Onsite Monitoring Server That We Configure & Maintain

Console & Alerts Made Available To Your Teams

What's The Industry Saying?

"Performance management is becoming increasingly important for enterprises as they seek to align their IT infrastructure with critical business processes to become more competitive and responsive to changing customer needs."
"IDC/Lucent Technologies 02/04"

"There is also a lot of NSM "shelfware" around because of overbuying, difficulties in implementation, lack of organizational and process development, and poor-quality NSM products."
Gartner 02/02

Why Monitoring Technology?

Drives network performance management to enable enterprises to better align their IT infrastructure with critical business processes to become more competitive and responsive to changing customer needs.

Enables the automation of repetitive operational processes.

Elevates the overall availability of the IT infrastructure by reducing costly network downtime.

Monitoring technology provides the integration of software tools, management processes and resources to provide enterprise managers with a coherent view of enterprise availability and performance.

But ... monitoring technology has been notoriously difficult to efficiently implement, leading to costly "shelfware" investments and missed optimization opportunities.

- Overbuying features
- Difficulties in "big-bang" implementation
- Lack of organizational and process development

TruePath Technologies solves these and many other industry issues!
